INSTRUCTIONS & ANSWER KEY

Your task is to match a folded paper with its correct unfolded pattern.
To solve these puzzles, imagine unfolding the paper one step at a time.
Each fold is a line of symmetry, meaning the hole will be mirrored across that line.

1. First, observe the number and direction of the folds.
2. Find the yellow dot showing where the hole was made.
3. Mentally reverse each fold.
4. Once you have the final pattern of holes in your mind, find the matching image on the right and connect them.

The pages get progressively more difficult.
